# HARD & SOFT TISSUE GRAFTING FOR TEETH & IMPLANT SITE DEVELOPMENT

## October 26 - 27, 2012

Presented by:  
Dr. Edward P. Allen  
& Dr. Lewis C. Cummings

## COURSE OBJECTIVES

This expanded course presents rationale and surgical techniques for:

- Bone and Soft Tissue Grafting for Implant Site Development
- Socket Preservation Techniques
- Particulate and Bone Block Allografts
- Vascularized Palatal Pedicle Grafts and AlloDerm
- Flap & Osseous Surgery for Esthetic Crown Lengthening
- Cervical Lesions: When to Graft and When to Restore

Dr. Lewis Cummings joins Dr. Allen for this course presenting practical procedures for solving implant site problems with minimally invasive allograft techniques.

## ABOUT THE SPEAKERS

Dr. Allen is past president of the American Academy of Esthetic Dentistry, the American Academy of Restorative Dentistry and the American Academy of Periodontology Foundation. He currently serves as the Periodontal Section Editor for the Journal of Esthetic Dentistry and serves on the Editorial Boards of the Journal of Periodontology and the International Journal of Periodontics & Restorative Dentistry

Dr. Allen received the Distinguished Alumnus Award from the Baylor College of Dentistry Periodontics Residency Program, the Master Clinician Award from the American Academy of Periodontology and the Best Teacher Award from the American Academy of Esthetic Dentistry. Dr. Allen is Founder and Director of the Center for Advanced Dental Education in Dallas, Texas where he teaches surgical technique courses. He has published over 50 articles in the area of esthetic surgery and continues to present numerous lectures and surgical demonstrations worldwide.

Dr. Lewis C. Cummings, a Houston native, received his dental degree from the University of Texas Health Science Center at San Antonio. While there, he received the Horace Wells Anesthesiology Award and the Annual Student Award for outstanding achievement in Periodontics from the American Academy of Periodontology. After graduating dental school with honors, Dr. Cummings continued his training

with a residency at the University of Nebraska Medical Center in Lincoln, where he completed a Masters Degree in Oral Biology and received his certificate in periodontics. While in Lincoln, Dr. Cummings began to research tissue engineering and has since lectured nationally on the topic. Additionally, Dr. Cummings has advanced his dental implant training by attending the world renowned Misch International Implant Institute. Currently, he holds associate professor positions with both the University of Texas Dental School at Houston and the University of Nebraska Medical Center in Lincoln; teaching soft tissue grafting and dental implants in the post-graduate programs. He is also an instructor with the Center for Advanced Dental Education in Dallas, Texas, teaching advanced periodontal plastic surgical procedures to dentists from around the world.
