**Course Objectives**

This unique two-day learning event will reveal the latest advances in minimally invasive Oral Plastic Surgical procedures.

Dr. Allen will discuss AlloDerm Regenerative Tissue Matrix as a safe and effective alternative to palatal tissue for the treatment of soft tissue deficiencies around teeth and dental implants, single- and multiple-tooth soft tissue ridge augmentation, and vestibular extension. You will learn the latest micro-surgical instrumentation, current suturing techniques and the rationale for use of PRP (Platelet Rich Plasma). Hands-on exercises with an illustrated step-by-step procedural manual will help you immediately incorporate these procedures into your practice.

Attendees will learn:
- Keys for successful soft tissue grafting
- Minimally invasive microsurgical instrumentation
- Specialized suturing techniques
- Rationale and technique for using PRP
- Current clinical research findings
