

# DEMYSTIFYING THE MAXILLARY SINUS

STEP-BY-STEP PREDICTABLE APPROACH TO  
LIFTING AND GRAFTING THE SINUS

14 CE  
Toronto, Ontario  
June 16-17, 2023

**Dr. Bart Silverman**  
Board Certified  
Oral and Maxillofacial Surgeon

A sinus lift is one of the most common bone grafting procedures for patients with bone loss in the upper jaw. The procedure seeks to grow bone in the floor of the maxillary sinus above the bony ridge of the gum line that anchors the teeth in the upper jaw. By strengthening and growing bone in this location, dental implants can be placed and secured in the new bone growth. During this course we will explore:

- The anatomical and radiographic structure of the maxillary sinus
- The history and progression of sinus lifts
- Osteotome techniques, vertical vs lateral lifts, and the comparison of all grafting materials
- Internal (vertical) and external lifts
- Follow up appearances of maxillary grafts
- Sinus grafting complications

Lecture  
and  
Hands-On  
Workshop
