

# MASTER VERTICAL BONE REGENERATION WITH DR. URBAN

Become a leading expert in the field of Predictable Vertical Bone Regeneration at our exclusive Regeneration Symposium.

Conquer one of the biggest challenges in implant dentistry: Vertical bone growth. This November, **world-class dental surgeon Dr. Istvan Urban** will visit North America all the way from Budapest to conduct the **first-ever ALL Dr. Urban Bone Regeneration Symposium**.

Join an elite group of dental experts for this 3-day immersive event where you will gain science-based solutions and techniques directly from Dr. Urban. Additionally, we invite you to explore our exhibitors' latest products and services to enhance your practice.

Take part in this exclusive symposium and optional hands-on workshop, crafted specifically to elevate advanced dental specialists and implant experts.

# Take your skills to the NEXT LEVEL

- Get the most up-to-date knowledge on hard and soft tissue regeneration and practical answers for daily practice.
- Explore the latest scientific discoveries in tissue regeneration and improve problemsolving skills.
- Discover the newest products and services from top exhibitors.
- Review cutting-edge methods for addressing hard and soft tissue deficiencies.
- Learn to select the most appropriate techniques for each patient.
- Dive deep into advanced topics like GBR, bone grafting and soft tissue engineering.
- Participate in hands-on workshops to master techniques.
- Earn up to 16 CE credits.

#### Hear what others are saying about Dr. Urban

The course was incredible, and the new options I can now offer my patients have renewed my passion for the profession. I'm excited to get home and put everything into action. Thank you so much for all your efforts in making this course a success and ensuring we all gained the maximum benefit.

### Get to know Dr. Urban

"The devil hides in the details!

We have discovered that developing minimally invasive regenerative techniques leads to favourable long-term clinical outcomes. I have a passion for sharing those important surgical details, the science behind all the innovation and the long-term follow-up of the cases that puts all details to a credible prospective.

I would like to invite you to join our courses where we honestly discuss the realities of hard and soft tissue regeneration." - Istvan Urban D.M.D, M.D, Ph.D

## A scholar, an author, and a pioneer

Dr. Urban earned both his DMD and MD degrees from Semmelweis University in Budapest in 1991 and 1996. He completed his oral surgery training at St. Istvan Hospital, followed by an internship in Periodontics at UCLA. After his Fellowship in Implant Dentistry at Loma Linda University, he became an assistant professor. Licensed in California, he runs a private practice in Budapest. In 2012, he earned his PhD in Periodontology from the University of Szeged, where he's now an honorary professor.

Dr. Urban is a board member of the Osteology Foundation, has published extensively on bone regeneration and soft tissue reconstruction, and teaches at the University of Michigan and Harvard School of Dental Medicine. He authored *Vertical and Horizontal Augmentation*, available in 12 languages, and the follow-up *VERTICAL 2: The NEXT LEVEL*.
