

URBAN BONE SYMPOSIUM

JAN 22 - 24, 2027 | MIAMI, FLORIDA

Three days. The master. *One event — North America.*

Dr. Istvan Urban, the world's foremost authority on vertical bone regeneration, makes a rare North American appearance as the sole speaker for an unprecedented 3-day symposium with optional hands-on training.

"The course was incredible and the new options I can now offer my patients have renewed my passion for the profession."

PAST ATTENDEE · URBAN BONE SYMPOSIUM 2024, CHICAGO

Master *Vertical Bone Regeneration*

with Dr. Istvan Urban

SYMPOSIUM OVERVIEW

Vertical bone regeneration remains one of the most demanding challenges in implant dentistry, and Dr. Urban has spent a career solving it. Over two full days at the Four Seasons Hotel Miami, elite clinicians receive unfiltered access to the surgical techniques, long-term case evidence, and clinical decision-making frameworks that define the current standard of care. This includes the **Sausage Technique®** and its application in vertical and horizontal ridge augmentation. For those seeking hands-on mastery, an optional third-day bone augmentation workshop offers direct practice under Dr. Urban's guidance.

Take your skills to the *NEXT LEVEL*

- Factors influencing the results in regeneration

- Vertical and horizontal bone augmentation for the severely atrophic maxilla and mandible

- Combining vertical ridge and sinus augmentation

- Minimally invasive bone harvesting techniques

- Soft tissue reconstruction of peri-implant papillae

- Suborbicularis preparation, periosteoplasty, and papilla shift techniques

- Flap advancement around the mental nerve

- Design and use of digital membrane guides

"There are a lot of speakers on bone grafting and implants, but no one has Dr. Urban's knowledge which is backed up by years of research and follow-up."

There is no other event like this.
